

INITIATIVE	Scaled Cloud, Digital and AI Enablement
AWARD	Celent Model Sell Side 2026 for Cloud and AI Enablement
EXECUTIVE SUMMARY	TP ICAP's Cloud Modernization Programme is upgrading its technology estate and client platforms by accelerating AWS cloud adoption, moving to cloud-native architectures and managed services to improve resilience, simplify operations, and speed delivery. It also embeds Generative AI into engineering workflows and enables governed innovation to automate processes, boost productivity, and deliver a more seamless, secure client experience.
TIMELINE	 <p>Strategic partnership with AWS (Dec 2024)</p> <p>Dedicated AI & Innovation Lab live (June 2025)</p> <p>Cloud adoption reaches 70% (Dec 2025)</p> <p>25 AI projects in production generating business value (Jan 2026)</p> <p>Flagship trading platform Fusion rebuild as Cloud & AI-native system (May 2026)</p>
KEY BENEFITS	<ul style="list-style-type: none"> • <i>Efficiency savings</i>: £8m saved in the front office and £13m in the back office through reduced data-centre reliance and lower run costs. • <i>Resilience & risk</i>: Critical technology incidents down 70%, improving certainty of execution for clients. • <i>Productivity</i>: SDLC up to 50% faster, speeding client value and shifting effort from infrastructure to client-facing innovation. • <i>Brand & reputation</i>: Strengthened TP ICAP's position as a tech-led market infrastructure provider, improving attractiveness to engineering talent.
KEY VENDORS	Amazon Web Services (AWS) with joint delivery teams
